CLEAPSS members	£130.00
CLEAPSS non-members	On request

CLEAPSS Don't Buy It, Make It!

Thursday 27 November 2019, 09.00 – 16.00hrs

Malmesbury School

Why come on this course?

This one day practical course is aimed at science technicians who wish to save their schools money by making science equipment at less cost than buying 'off the shelf'.

The objective of the course is for participants to gain experience in soldering, using hand tools and working with different materials to make a selection of items featured in the CLEAPSS Make-it guides. The items range from those which can be made from materials found in the prep room or purchased from DIY outlets to those which can be made from more sophisticated components.

Participants will take away everything that they make along with ideas for future DIY projects.

During the course about 10 items are made, usually drawn from this list:

- Spirit burner
- Bottle top crucible
- Inoculation loop
- Marble chip burner
- Stand for gas preparation apparatus
- Microscale electrolysis apparatus
- Soldering aid
- Soldered and other connecting leads
- 1.5V battery holder
- Electrical component holder
- Bulb holder
- Arduino data logger
